

# Foundations of Algebra II Summer Assignment 2022

These are the directions for your summer assignment for next year's course. This is an opportunity for you to review selected topics from Algebra One to make sure you are ready for the new material in Foundations of Algebra 2.

## Your summer assignment:

1. Join google classroom using the code **l6qyy3a**
2. Go to [deltamath.com](https://deltamath.com) and create a student account. Use the code 477084 to join my class. The period you should be picking is Foundations of Algebra 2 – Summer 2022. Complete each of the standards there and watch the example videos as needed.
  - Your summer assignment will count for 5 homework checks and will be collected the first day of class. The printed vocabulary pages must be turned in also.
  - The third day of school, you will have a test on the summer assignment material. Two class days is not enough time to re-teach the information in the packet. It is your responsibility to come to school on the first day with only the questions that you could not work out on your own.

## For the first day of class:

- ✓ Have your summer assignment, with the printed vocabulary, stapled and ready to turn in.
- ✓ Solely for Foundations of Algebra II, have a binder ready with dividers, white lined paper and graph paper. It is recommended that you have at least a 2" binder.
- ✓ Bring your graphing calculator. We recommend the TI -84, TI-83 Plus or TI-83.
- ✓ Bring your pencils (not pen!) and a ruler.

This will help us get off to a great start and lead us to an enjoyable and rewarding school year!

*Mr. Griffith and Mr. Vaccari*
